

# Growing Group

The Growing  Group is one of Rugby Eco Hub's many voluntary Community Projects for increasing local resilience in the face of climate change and biodiversity loss

These projects are designed to help people, locally, to:

***REDUCE, REUSE, REPAIR, RECYCLE AND REGENERATE***

Our Growing  Group aims to give you confidence to grow a diversity of fresh and tasty vegetables and herbs in any outdoor space, cheaply, organically and naturally.

We're here to provide support and help if you want it and would also welcome your help as a volunteer!

***GET GROWING, EAT WELL AND BOOST BIODIVERSITY***

## ***Growing Tasty Food in Small Spaces – Look at our Planters***

The Eco Hub
